

## How to Install First Voices Keyboard on a Mac Computer

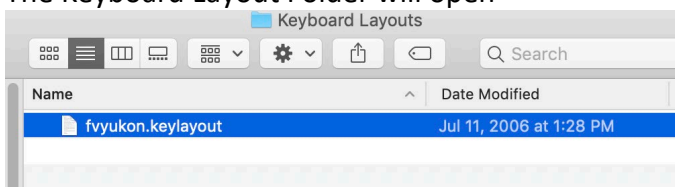

1. Copy the following Keyboard to your Downloads folder  
<https://www.firstvoices.com/nuxeo/nxfile/default/3f33996d-b622-44a3-b7c6-0635c0a82349/file:content/fvyukon.keylayout>
2. Open your Downloads folder in Finder and **Copy the following file from Folder:** 'Downloads/fvyukon.keylayout' - Right click and Copy the file
3. In 'Finder'
4. Click on 'Go' in the top menu

5. Click on 'Go to Folder...'
6. Enter: ~/Library/Keyboard Layouts/
6. Click on 'Go' button

7. The Keyboard Layout Folder will open

8. Paste the Keyboard file into the folder
9. Restart your computer

10. Open **System Preferences >Language and Region**. Click the **Keyboard Preferences** button at the bottom.
- Click the **Input Sources** tab at the top.
  - Click the + (plus) sign at the bottom left to 'add a keyboard layout'.
  - Select **Others** in the left-side pane, this should display a list of keyboard layouts which includes the one you are looking to activate. Select the keyboard you want and click **add 'FV Yukon'**.
  - The keyboard is now ready to use.
11. To access the key layout, you need to go between Canadian and FV Yukon keyboards. Click on the Canadian flag at the top of your screen. Select the keyboard layout 'FV Yukon' from the list.
