Axh Xhùnx'í

My Relatives

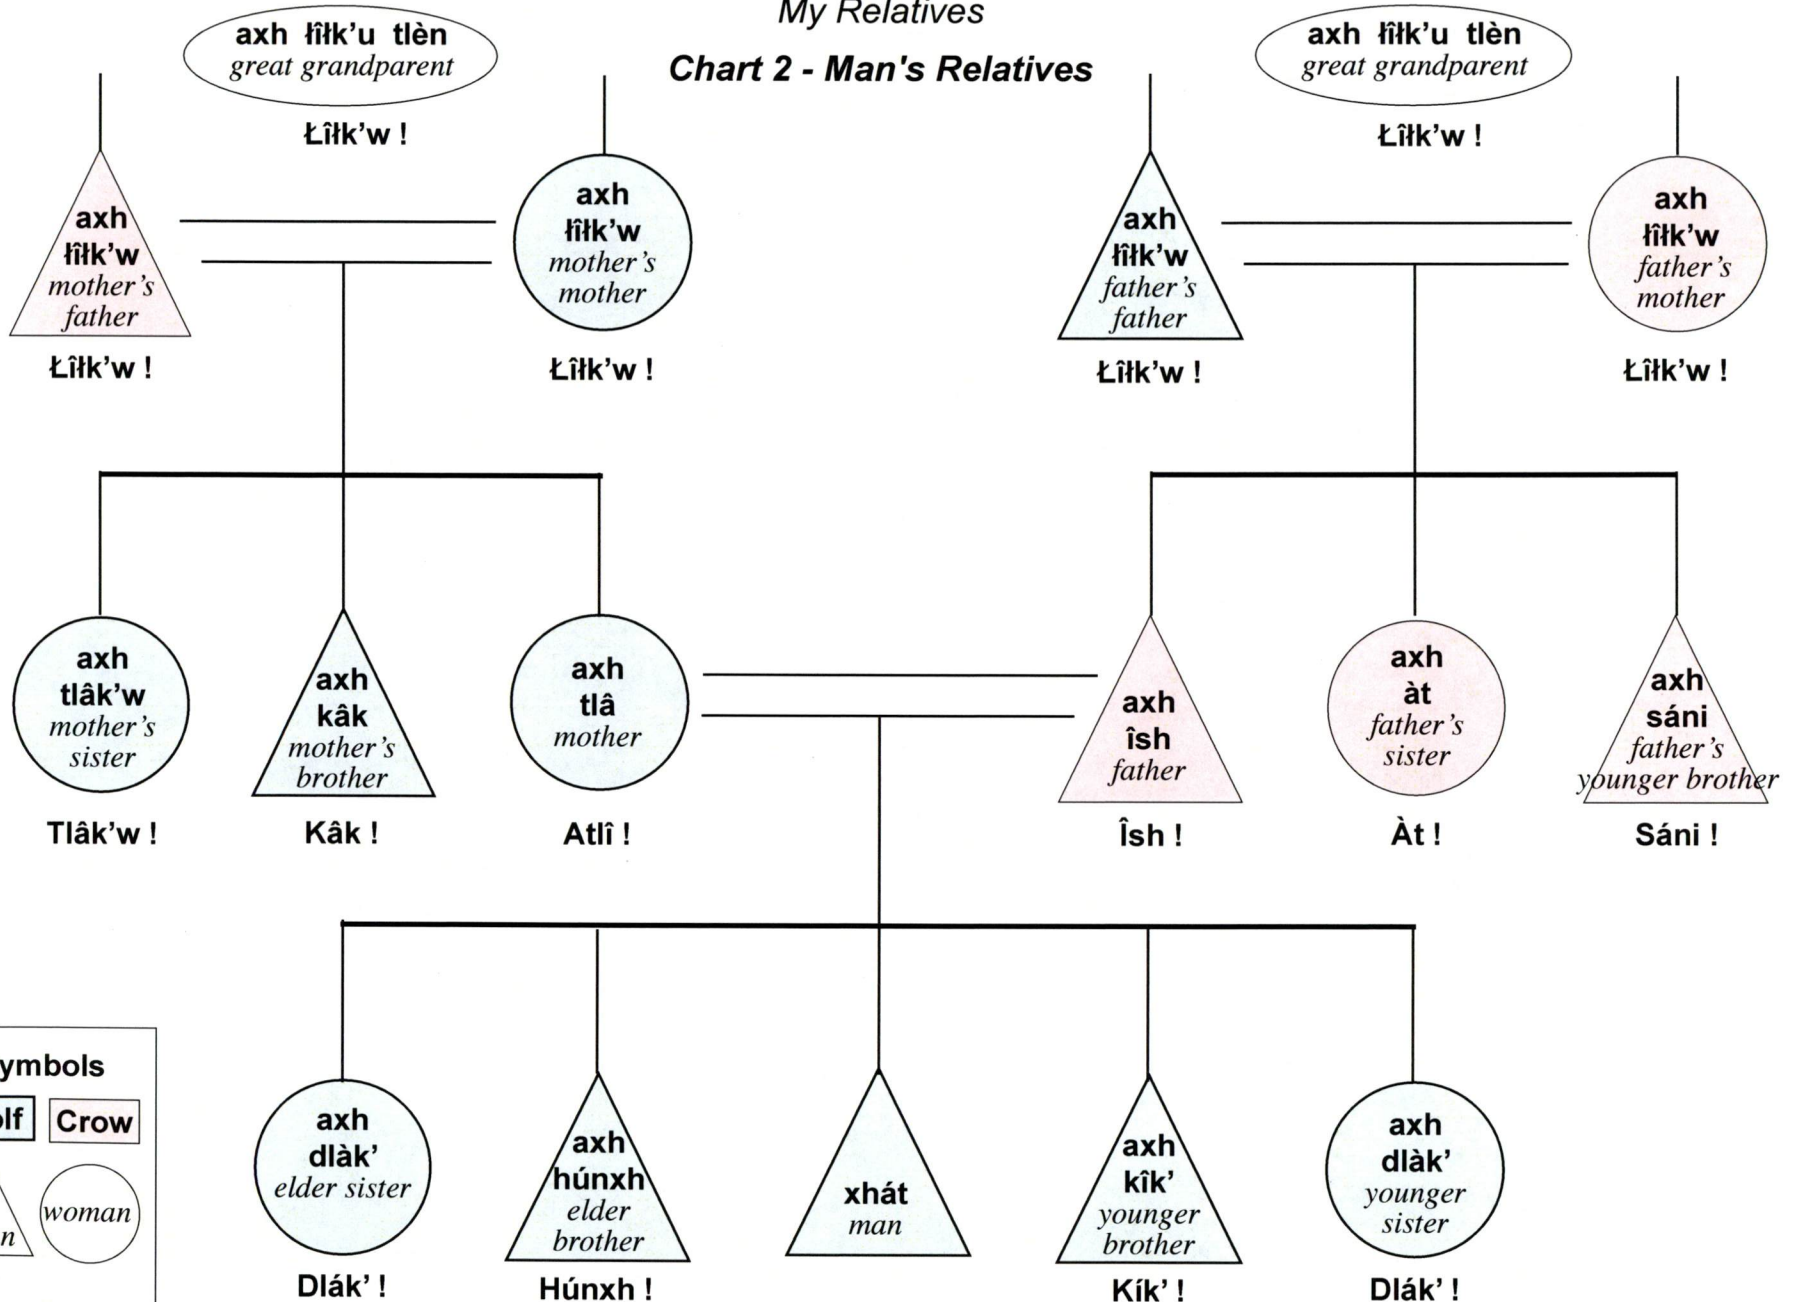

Chart 1 - Woman's Relatives

Axh Xhùnx'í

My Relatives

Chart 2 - Man's Relatives

Akh Xhùnx'í - My Relatives

On the charts, blue is wolf moiety and pink is crow. The first born (eldest) of siblings is on the left, youngest on the right. A triangle represents a male, a circle a female. (T) = Teslin dialect, (C) = Carcross dialect, (A) = Atlin dialect.

Vocative is the form that is used to call a person. So, for example, you use *akh îk'* to talk about your younger sibling, but if you are talking to him or her you use *ík'*!

Chart 1 - a Woman

This chart is seen from the point of view of the woman in the bottom row, centre. The following terms are used by a female referring to her relatives.

		Vocative
<i>Woman:</i>	<i>xhát</i>	
<i>Woman's younger brother:</i>	<i>akh îk'</i>	<i>ík' !</i>
<i>Woman's elder brother:</i>	<i>akh îk'</i>	<i>ík' !</i>
<i>Woman's elder sister:</i>	<i>akh shátxh</i>	<i>Shátxh ! (T, A)</i>
	<i>akh shétxh</i>	<i>Shétxh ! (C)</i>
<i>Woman's younger sister:</i>	<i>akh kîk'</i>	<i>Kík' !</i>
<i>Mother:</i>	<i>akh tlâ</i>	<i>Atlî !</i>
<i>Mother's brother:</i>	<i>akh kâk</i>	<i>Kâk !</i>
<i>(or)</i>	<i>akh tlâ du îk'</i>	
<i>Mother's sister:</i>	<i>akh tlâk'w</i>	<i>Tlâk'w !</i>
<i>(elder)</i>	<i>akh tlâ du shátxh</i>	
<i>(younger)</i>	<i>akh tlâ du kîk'</i>	

Note the simple term axh kâk (my maternal uncle) can be spelled out by saying axh tlâ du îk' (my mother's brother). However, axh tlâk'w (my maternal aunt) must be spelled out as either axh tlâ du shátxh (my mother's elder sister) or as axh tlâ du kîk' (my mother's younger sister).

Chart 2 - a Man

This chart is seen from the point of view of the man in the bottom row, centre. The following terms are used by a male referring to his relatives.

		Vocative
Man:	xhát	
Elder brother:	axh húnxh	Húnxh !
Younger sister:	axh dlàk'	Dlák' !
Elder sister:	axh dlàk'	Dlák' !
	<i>(note tone is high and short in vocative form)</i>	
Younger brother:	axh kîk'.	Kík' !
Mother:	axh tlâ	Atlí !
Father:	axh îsh	Îsh !

Note : If a man is talking and says axh kîk' it means his younger brother, but if a woman is talking and says axh kîk' it means her younger sister. Axh kîk' is a younger sibling of the same sex as the speaker. Elder siblings of same sex are distinguished. For example, axh shátxh is my elder sister (woman speaking), axh húnxh is my elder brother (man speaking).

Note also that kik'.à (younger one), shatxi.à (elder one, female), and hunxhi.à (elder one, male) may modify other kin terms. For example:

kik'.à axh dlàk' *my younger sister (man speaking)*

hunxhu.à du kâk *his / her elder maternal uncle*

The practice of "spelling out" a relationship is particularly useful when it comes to general terms like axh fîk'w, which refers not only to any grandparent but further to any member of the clan the speaker belongs to.

The specific type of grandparents can be spelled out as follows:

axh tlâ du tlâ *my mother's mother*

axh tlâ du îsh *my mother's father*

axh îsh du tlâ *my father's mother*

axh îsh du îsh *my father's father*

Formal Address

Jane Smarch spoke about addressing one's relations in a formal setting like a speech at a potlatch. Tlingit oratory on a formal occasion is a different level of speech than everyday speech.

For example, when a member of the host wolf clan wants to thank all the (wolf) hosts for a party, s/he would say near the beginning of his/her end-of-potlatch speech, speaking to his/her own clan members:

Yak'êyi khu.ù,	<i>"You good people,</i>
axh sani hás,	<i>my uncles</i>
axh àt hás,	<i>my aunts</i>
axh ìl̥k'u hás,	<i>my grandparents</i>
axh kàni yán,	<i>my brothers and sisters-in-law</i>
ch'a yê axh xhùnx'í,	<i>(and) my close relatives (people of my clan)"</i>

After dictating this early address in a potlatch speech (above), Jane pointed out that the spokesperson for the hosts of the potlatch would begin the speech by addressing the guest clans, mentioning cross-clan aunts, uncles and in-laws, and grandparents of the opposite clan, searching the faces of the audience for guest clan members and trying to name as many cross-relationships as possible. Then finally the speaker mentions her own clan and close family as above, once the guests have all been honoured.

Brief History of Written Tlingit

1. Earliest Explorers - the Russians.

They recorded some archaic forms that let us see deeper into the history of the Tlingit language.

- a) Count Chamberlain von Rezanoff (early 1800s). He desired a trading vocabulary. He took a Russian word list, then recorded their translations into many languages, including Aleut, Sugpiaq, Eyak, and Tlingit. He was a poor phonologist.
- b) Bishop Innocent, formerly Fr. John Veniaminoff (1820s on). His philosophy was to make an effort to learn the local language before starting to preach. He kept good documentation and was the first to identify glottalized consonants in Tlingit.

2. Anthropological Era

- a) William Kelly and Frances Willard. They used phonetic symbols as shown in contemporary dictionaries to represent the sounds of Tlingit, and wrote *Grammar and Vocabulary of the Hlingit Language of Southeastern Alaska* (1904). They started to figure out the forms of Tlingit verbs.
- b) Franz Boas. He is known as the "Father of American anthropology" but was also a good linguist. He understood the Tlingit sound system and worked with Louis Shotridge.
- c) John R. Swanton. He wrote *Tlingit Texts and Myths* (1909) and learned a fair amount of Tlingit vocabulary, though he was not as good a linguist as Boas. Swanton used exclamation point for glottals, and used q! for three different sounds : x', xh', and kh'.
- d) Frederica de Laguna (1970s) used Boas' transcription.
- e) Catherine McClellan (1970s) used Boas' transcription.

3. Modern Era

- a) Constance Naish and Gillian Story (1960s).
- b) Naish - Story - Leer (1972)

The tones of words and vowel length can change in context. With the Interior system, the same vowel letter is always used, regardless of length.

A word can have different vowel length as well between speakers. In Coastal Tlingit, this can mean use of different letters for the same word. In Interior Tlingit, only the mark changes. Example:

du hídi ~ du hídee (varies among speakers)

du hídi ~ du hídi.

First Naish-Story Writing System

This system used a final -h to mimic English short vowels:

-ah, -oh, -eh, -ih
